

THE SOCIAL COMPUTE NETWORK

Powering the **AI Agent** Revolution

Private and Confidential

"Compute is the currency of the future"
said Sam Altman.

But what kind of currency is it when
95% of those who need it are excluded
by **prohibitive costs, limited supply,**
and **centralized control?**

“

Computing power will be the
currency of the future, not fiat
currencies like Bitcoin or even
the U.S. dollar.

Sam Altman
Founder & CEO of OpenAI

The Compute Crisis for AI Agents

The demand for compute to run AI Agents and applications is skyrocketing, but the current centralized compute model creates a massive barrier

Scarcity

Compute resources are limited and controlled by centralized giants.

High Costs

Prices are rising, making it unaffordable for consumers and SMBs to deploy AI solutions.

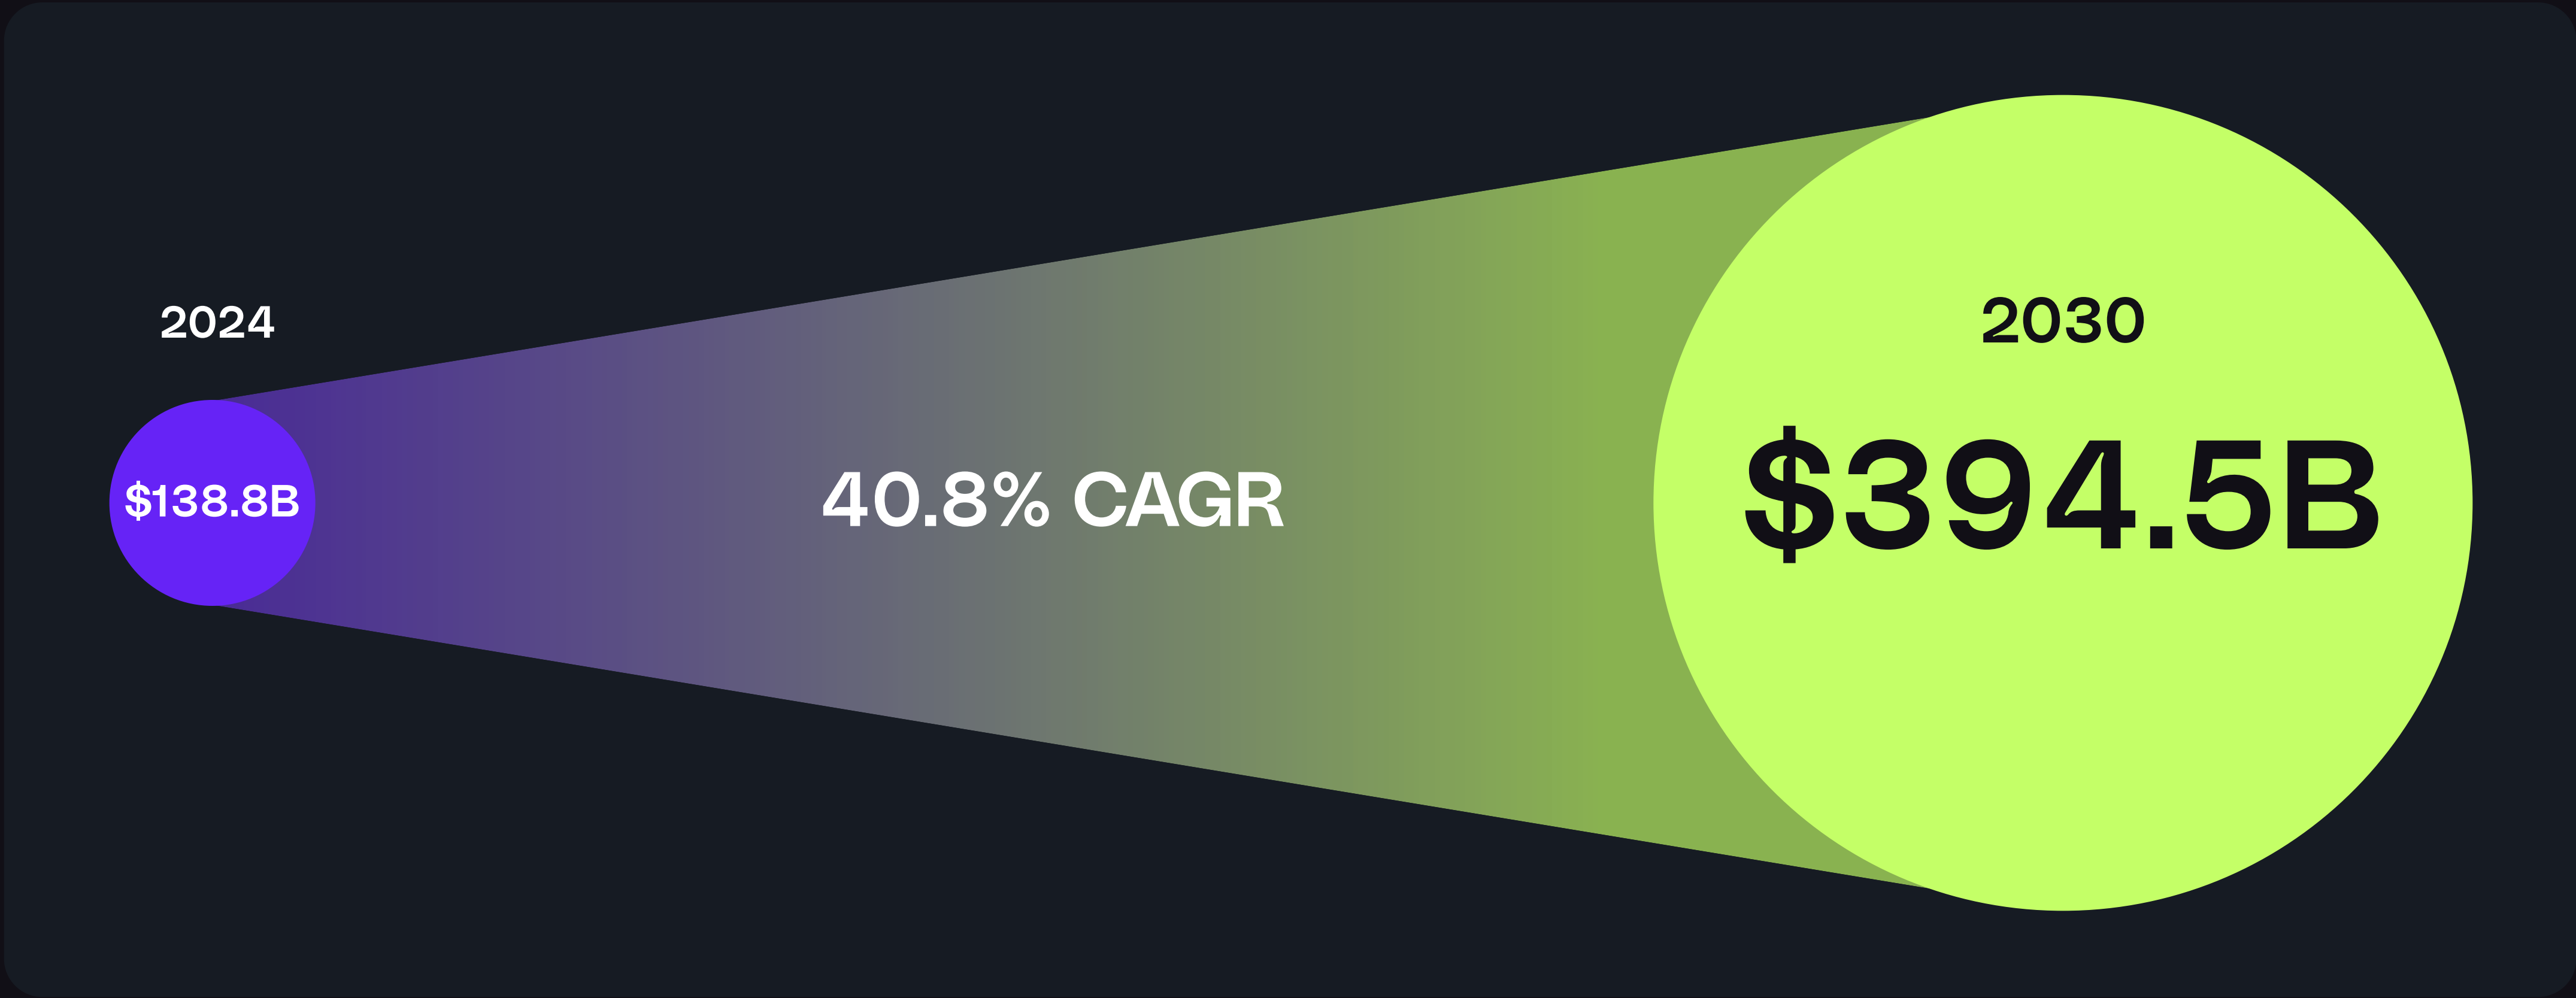

Exclusion

General users and smaller businesses are being priced out of participating in the AI revolution.

Compute for AI Agents and Applications

The Fastest Expanding Sector of AI

Growth Drivers

AI/ML Workloads

Digital Transformation

Edge Computing

Global Compute

Breaking Barriers, Empowering Innovation

Edge Compute Solutions Only **Decentralization** Can Deliver

Global Reach, Local Efficiency

A decentralized network that taps into underutilized resources, vastly expanding compute availability for localized AI agents and applications.

Decentralizing Power

Distributing compute power across a decentralized ecosystem ensures no single entity controls access or innovation.

Affordable Compute for All

Decentralized pricing lowers costs, ensuring accessible compute for developers and businesses.

Gamification

Gamification drives engagement by rewarding participation, transforming distributed compute into an exciting, collaborative experience.

INTRODUCING

NUMA

The First Gamified Social Compute Network

Where the top online communities come
together to compete in seasonal tournaments
while powering the AI Agent Revolution

Decentralized Compute Network.

Adaptive Compute Assets (ACA)

The Expandable Digital Asset to Run AI

Adaptive Compute Assets (ACAs) are dynamic digital assets that amplify the NUMA compute grid.

- Dynamic Metadata Evolution
- Self-Adaptive Capabilities
- Decentralized Compute Ownership
- Incentive-Driven Participation
- Scalable Network Integration

Go-To-Market →

Powering the AI Agent Revolution

We target rapidly expanding markets to scale our business

Phase 1
Creative Professionals
and SMBs

Market Size	CAGR
\$32 B	43.9% (2025-2030)
SAM	ARPU
4,250,000	\$50/month

Phase 2
AlaaS Platforms
and Providers

Market Size	CAGR
\$621 B	39.5% (2025-2030)
SAM	ARPU
250,000	\$500/month

Phase 3
Educational, Medical and
Governmental Agencies

Market Size	CAGR
\$451 B	41.1% (2025-2030)
TAM	ARPU
5,000	\$50,000/month

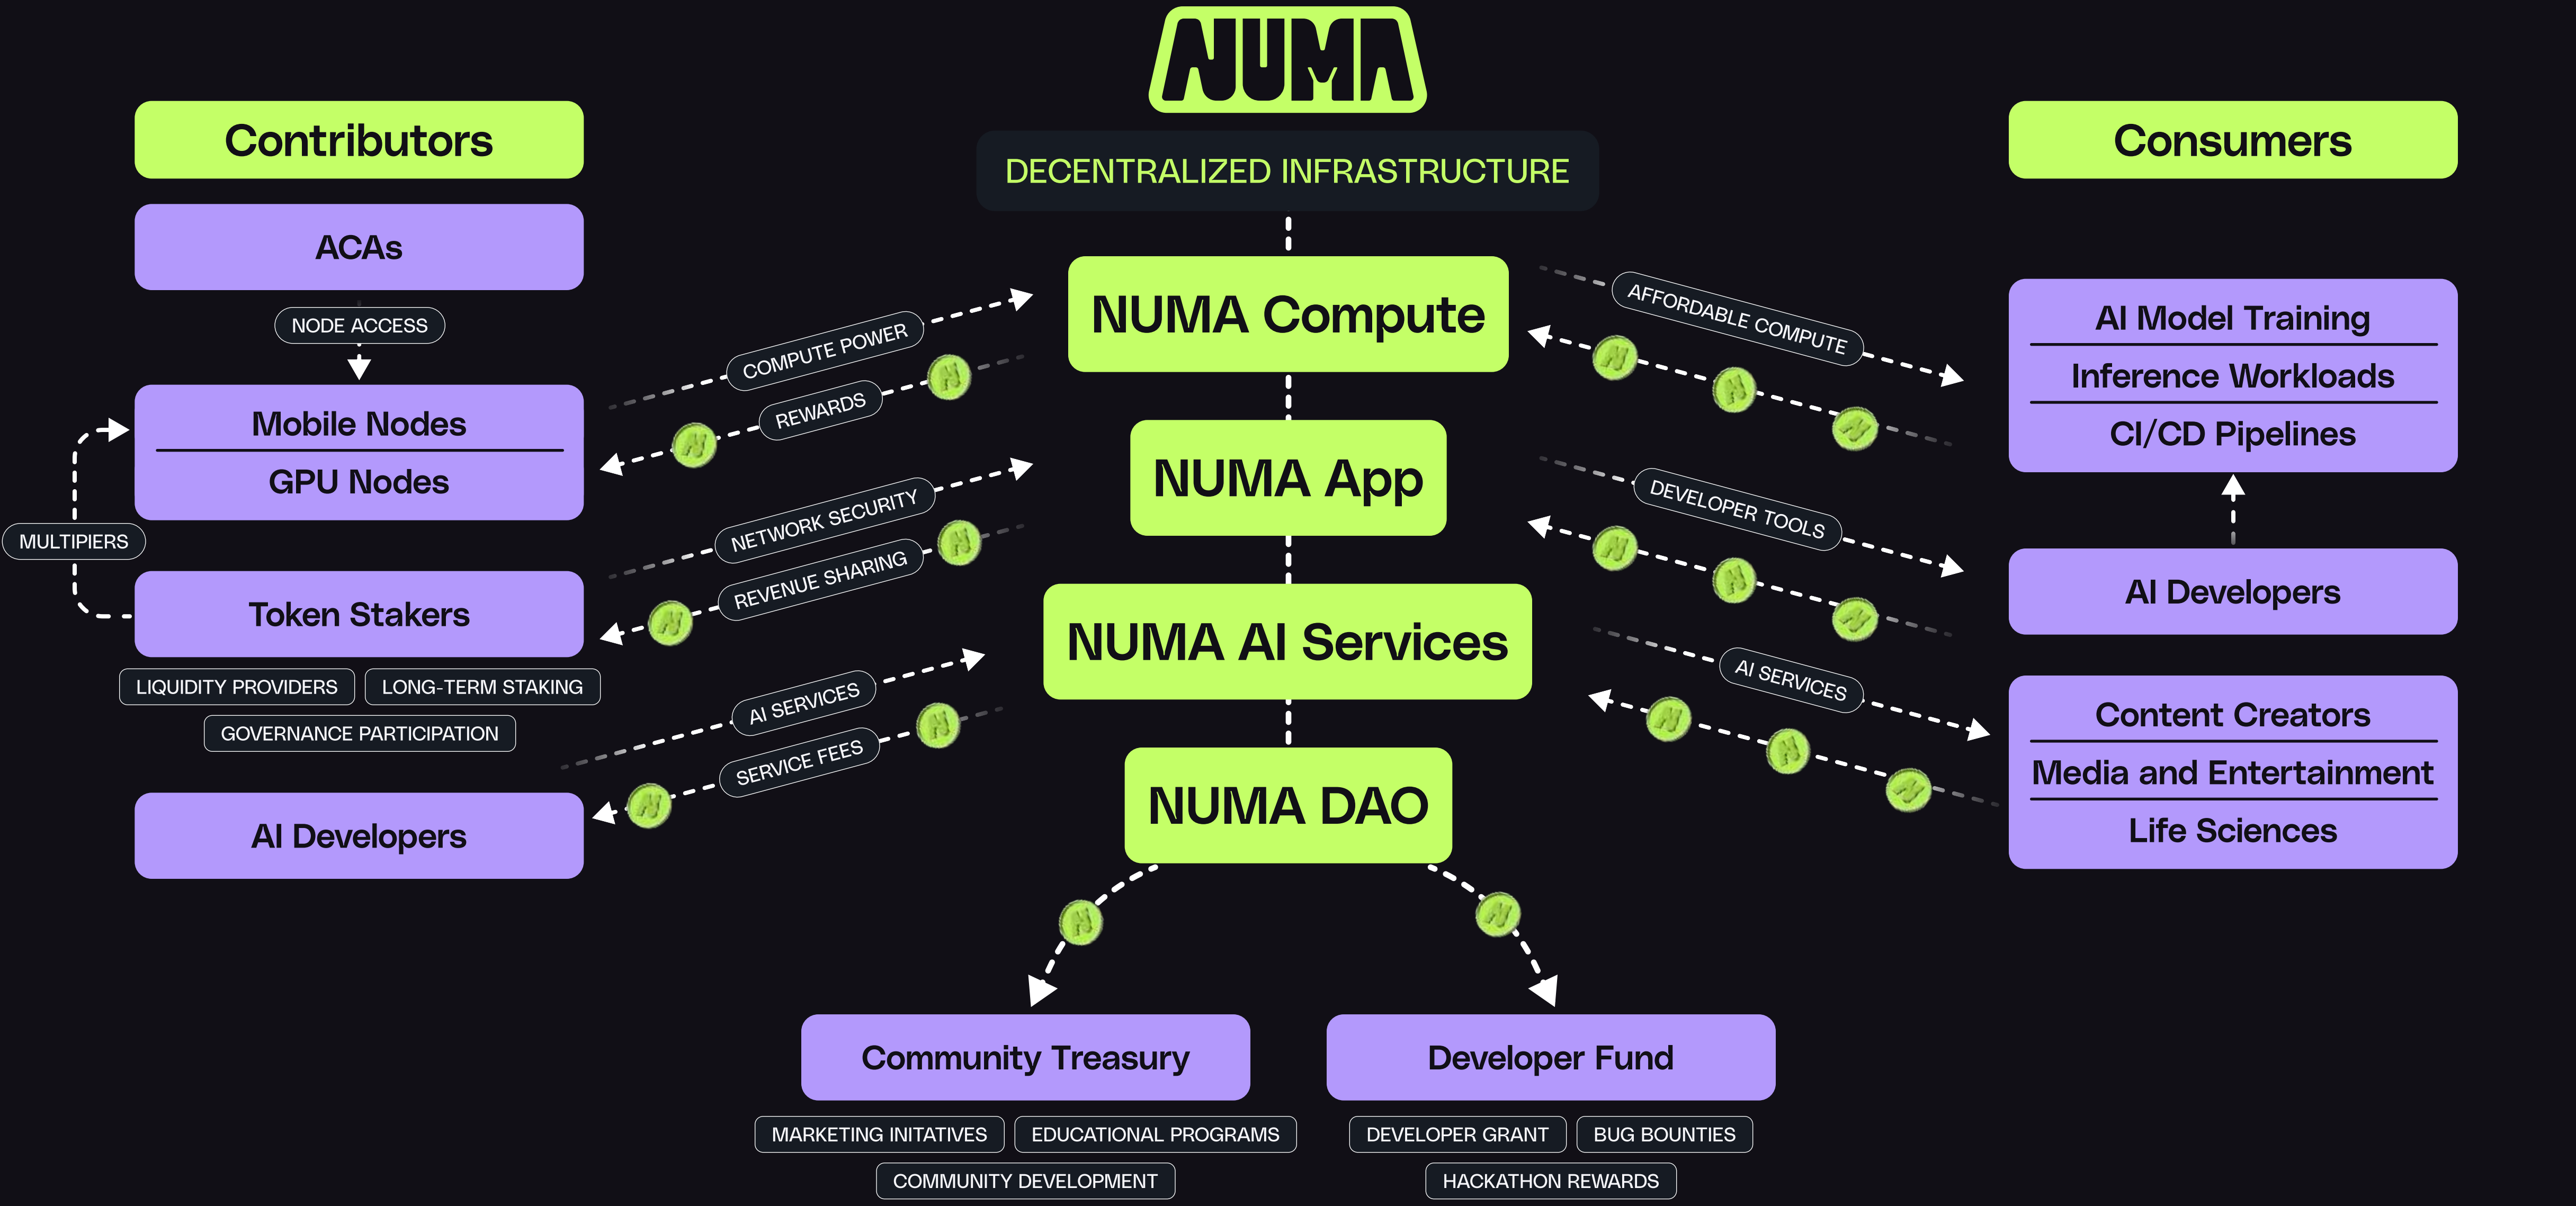

Competitive Analysis

						
	NUMA	Akash	Render	ANKR	Golem	CUDOS
Decentralized Compute Resources	✓	✓	✓	✗	✗	✗
No-Code Tools	✓	✗	✓	✗	✗	✗
Global Predictable Pricing Models	✓	✓	✓	✓	✗	✗
Mobile Edge Compute (MEC)	✓	✗	✗	✗	✗	✗
Smart Contracts	✓	✗	✓	✓	✗	✓
Community Governance (DAO)	✓	✓	✓	✗	✗	✗
Adaptive Compute Assets (ACAs)	✓	✗	✗	✗	✗	✗
Blockchain-Based Transparency	✓	✗	✓	✓	✗	✗
AI Model Versioning and Interoperability	✓	✗	✗	✗	✗	✗

User/Token Flow

How We Make Money

Compute Resource Monetization

- Pay-as-you-go pricing for decentralized compute power
- Enterprise subscription plans
- Projected Y1: \$10M | Y3: \$30M

NUMA Assistant

- 5-10% transaction fees on AI model sales
- Premium features subscription
- Projected Y1: \$5M | Y3: \$25M

ACA Economics

Initial Minting

- Mint Price: 200 USDT per ACA
- Total Supply: 100,000 ACAs
- Initial Revenue: \$20M potential from full mint

Secondary Market

- 5% Royalty on All Secondary Sales
- Estimated Monthly Trading Volume: \$1M
- Projected Annual Royalty Revenue: \$1.2M

Chris R. Dawe 
Co-founder, CEO

Ex-CEO of Effect.AI, blockchain entrepreneur since 2016, with impactful Web3 collaborations with the UN.

Nahil Yuser 
Co-founder, CCO

Web3 UI/UX for 8 years. Previous Lead Designer of Effect.AI, Nosana and LaunchMyNFT.

John Heeter 
Co-founder, CTO

Mastermind behind distributed system architecture with 8 years of Web3 expertise and full-stack dev wizardry.

Tom Zellman 
Lead Engineer

Full-stack Engineer with over 20 years of expertise in crafting high-quality, scalable software solutions.

Giorgi Gvasalia 
Data Science Lead

Advanced data scientist, Texas A&M grad, specializing in Python-powered insights and way ahead of the AI Agent revolution.

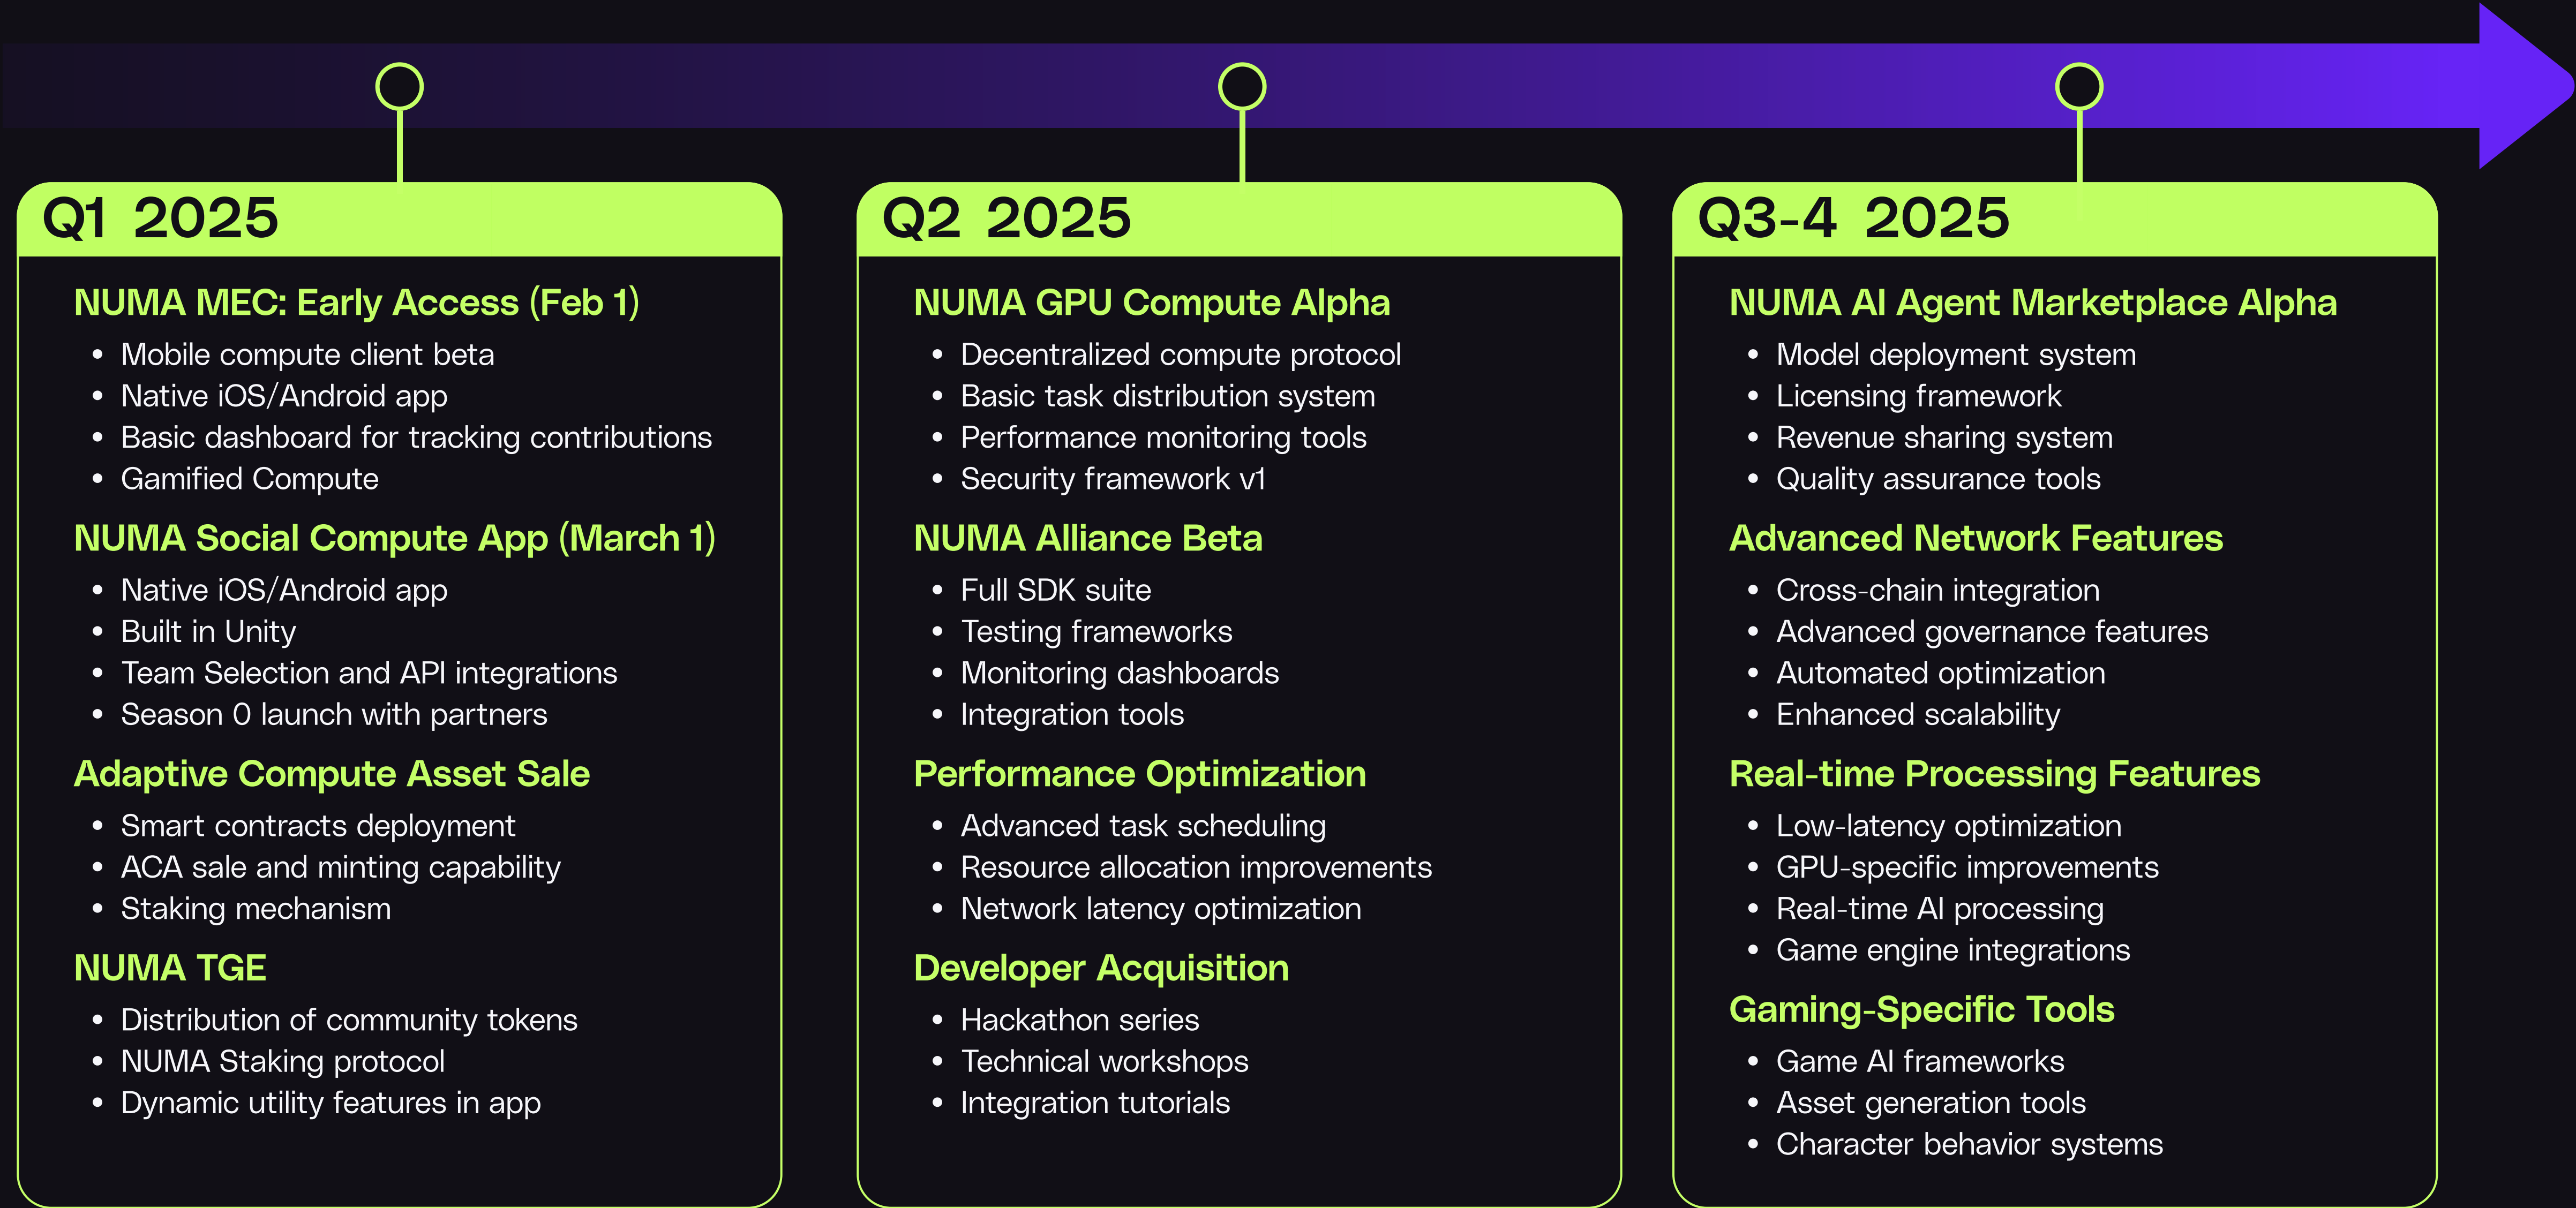

Louis Fong 
CMO/Partnerships

Marketing and partnerships Guru with a vast network in the Web3 throughout the Asian markets.

Dasha Day 
Content Lead

Commercial actress and social media pro, the brilliant force behind NUMA's lens.
